

IC-1107 Electro Acupuncture Apparatus

A handy palm-sized acupuncture apparatus with subminiature construction

which provides the smallest electro-acupuncture unit in the market.

It has the following features:

- High performance and versatility are packed into a handy palm-sized unit.

- Subminiature construction provides the smallest electro-acupuncture unit in the market.
- Three output channels.
- Low/High intensity settings -"Low" for needles and "High" for magnetic electrodes. Broad pulse rate-500 pps maximum.
- Safe, reliable and easy to use. The intensity of each channel is independently controlled. Pulse shape minimizes electric corrosion. The dial control enhances safety and ease of use. A built-in battery checker is included.
- MDD CE-marked ce0123

Standard Accessories :

Soft carrying case 1 case
Lead wires 3 pairs

Specifications :

Pulse rate	0-500 pps. Variable
Intensity	Low setting : max 20 mA High setting : 30 mA (1000 ohms test load)
Pulse width	100 microseconds
Pulse shape	bi- phasic
Output	3 channels
Others	Battery checker. Pulse rate indication
Power Source	one 9V battery
Size	61 x 96x27 mm
Weight :	200 gm
